

FEAM European Biomedical Policy Forum

Annual lecture: “*Biomedical and health research: developing a vision for Europe*”

Programme

21 March 2018 (14:30 – 18:30)

Hotel Steigenberger Wiltcher's, Avenue Louise 71, 1050 Brussels, Belgium / Ballroom

14:30-15:00	Registration and coffee
15:00-15:15	Welcome and Introduction <ul style="list-style-type: none"> • Bernard Charpentier, President, Federation of European Academies of Medicine (FEAM)
15:15-15:45	Keynote lecture <ul style="list-style-type: none"> • Line Matthiessen, Acting Director, Health Directorate, European Commission, Directorate-General for Research and Innovation
15:45-17:20	High-level panel discussion: A vision for European biomedical and health research <i>Moderator: Jacki Davis, journalist</i> Panellists: <ul style="list-style-type: none"> • Line Matthiessen, Acting Director, Health Directorate, European Commission, Directorate-General for Research and Innovation • Robert Lechler, Vice-Principal (Health) and Executive Director of King's Health Partners Academic Health Sciences Centre, President of the UK Academy of Medical Sciences • Paul Stoffels, Chief Scientific Officer, Johnson & Johnson • Karin Sipido, Professor of Cardiology, Department of Cardiovascular Sciences, KU Leuven, Chair of the Scientific Panel for Health • Nick Meade, Director of Policy, Genetic Alliance UK <i>The panel discussion will include a Q&A with the audience</i>
17:20-17:30	Concluding remarks and next steps <ul style="list-style-type: none"> • Stefan Constantinescu, Vice President, Federation of European Academies of Medicine (FEAM)
17:30-18:30	Networking cocktail

About the lecture

Background

Improving people's health and wellbeing is the fundamental goal of research and innovation and European cross-sectorial cooperation is paramount to achieve this goal. European Union's programmes have led to improved health and quality of life for citizens. However, important medical challenges still remain to be faced and many healthcare needs remain unmet.

The current debate on the **next EU Framework Programme for Research and Innovation (FP9)** offers the opportunity to articulate a long-term vision for biomedical and health research, and to address current gaps in support of excellent science.

Aim of the event

To contribute to this debate, the FEAM European Biomedical Policy Forum's annual lecture will bring together policy-makers and high-level representatives from across different biomedical sectors to present their vision for the future of biomedical and health research in Europe, and how the European Union's funding programmes could help achieving this. In particular, the following topics will be addressed:

- Thematic priorities for future biomedical and health research, in particular:
 1. What should be the research 'moonshot' missions in the health/biomedical area?
 2. How to link future research priorities with the UN Sustainable Development Goals (SDGs)?
- Current gaps in the support of biomedical and health research in Europe;
- How to improve coordination and consolidation of biomedical research across Europe.

About the FEAM European Biomedical Policy Forum

The FEAM European Biomedical Policy Forum is a partnership based Forum which provides a platform for discussion on key policy issues for the biomedical community.

The Forum is an initiative from the Federation of European Academies of Medicine (FEAM). It aims to bring together representatives from academia, research charities, industry, European and national trade associations and professional bodies, regulators, public health bodies, and patient and consumers groups. Partners join on an equal footing, regardless of size and type of organisation.
