

# Transforming the future of ageing

## Lessons from the SAPEA report and its application to the Romanian context

Science Advice for Policy by European Academies (SAPEA) brings together outstanding expertise in engineering, humanities, medicine, natural and social sciences from over 100 academies, young academies and learned societies across Europe. SAPEA is part of the European Commission's Scientific Advice Mechanism. Together with the Group of Chief Scientific Advisors, it provides independent scientific advice to European Commissioners to support their decision-making.

For its 2019 report *Transforming the future of ageing*, SAPEA brought together eminent European scientists to explore and respond to the question "What policies at the EU level could support member states in achieving inclusive, fair and sustainable systems of health and social care to promote the taking-up of innovation for ageing societies?".

This meeting will present the SAPEA report to the Romanian public, researchers and policy stakeholders, and discuss the evidence it contains in the light of demographic, health and economic conditions in Romania.
